

DIS enbi

INVISIBLE KNOWHOW

DIS enbi seals are well known in the sealing industry as a specialized supplier of custom made systems and solutions where elastomers are involved.

Our innovative products are used in consumer and industrial products. Application-specific components are designed in close cooperation with our customers and based on our trusted and unique knowledge of technical rubbers. A range of specific rubber types is developed in our laboratory for various customer applications. Our inhouse capabilities ensure fast and cost effective production and development.

A sample of our Jacking Coupling Range

Why not view our full range on our website:

Website:
www.diseuro.com

Our technologies

- Compression rubber molding max. platen size 1m x1m and 3mx0.4m

Injection rubber molding max.2.0 liter injection maximum platen size 800x800 mm

- Shot jointing up to a width of 300mm
- Rubber bonding and adhesion to different metals
- Manufacturing and assembling systems to include rubber, plastic and steel parts.
- Cutting, forming and welding various sheet metal for precision coupling applications.
- CNC cutting of various sheet materials up to a size 1.5m x3.2m.

Development capabilities

- Rubber compound development
- Rubber testing -mechanical properties
 - stress relaxation
 - ozone resistance
 - oil resistance
- 3D design, prototyping, mould design and sampling
- Simulation/functional tests.

Materials

- In house developed SBR,EPDM,NBR and Silicon compounds, all in various colours.
- Specialized material for epoxy adhesion.
- Low friction material.
- High temperature material
- Reinforced material

Approvals

ISO 9001, BSI,MPA,KIWA,KOMO,GASTEC,DGS,BELGAQUA

Production and sales facilities

Ireland - DIS enbi seals Ireland Ltd.
Netherlands - DIS enbi seals Europe BV
India - DIS MRP Pvt Ltd.
